

AID Advanced Dermatopathology Course 2026

The course is run over two semesters of 14 weeks each semester . It follows on from the DermPath Membership course. In Semesters 1 and 2 we will discuss more detail in DermPath correlation. We will look at virtual slides for each topic and this interaction will be recorded for later review.

You should consider buying 3 books for the course. 1 Christine Ko Dermatology Visual Recognition and Case Reviews. 2 Dermatopathology by Dirk Elston and Dermatopathology Challenge by Barnhill McGraw Hill. The Ko book I want you to buy. The other two are for reference.

We will use the Ko book as the primary text because it best integrates DermPath with the clinical presentation and that is what I really want to teach you during this course.

We will access some Virtual Slides for each module.

There is a one hour recorded video each week for each module. The course is completely online. You will receive emails twice a week detailing what you should be studying. There are no module assessments but there are online live end of semester exams .

If you pass the Advanced Course you can take the Fellowship course in 2027.
